Jails Department

TENDER NOTICE

No. M4 -613/2013.

24th April 2013.

Disposal of Plastic waste is a problem because of lack of awareness about proper and scientific waste Management. The consumption of plastic increases day by day. Nearly 50% of plastic is used for packing. Once used waste plastic is either thrown away or littered. Both are harmful to the humanity. If thrown out, it will mingle with municipal waste and sometimes will be land filled. Since plastic is non-biodegradable land filling is only postponement of waste disposal and it is not a permanent solution to the problem. Burning of plastic will pollute, the environment. The technology through which plastic waste can be processed scientifically and a brick known as PLASTONE can be made and it would be a proper and eco friendly method for the disposal of plastic solid waste. The technology is developed by Thyagarajar College of Engineering, Madhurai. It can be used as a substitute to cement brick/country burned brick etc. in low

cost. Government have accorded administrative sanction for the starting of a plastone making unit in Jail. Number of construction work is going on in the department under the 13th Finance Commission Award. By using plastron for construction work, we can reduce the cost of construction.

Sealed tenders are invited for the supply of Machineries for the Plastone Block Making Unit in the Central Prison, Thiruvananthapuram as detailed below.

Sl. No.	Machineries
1	Loading Conveyor
2	Heating Chamber (Electrical)
